Tournament is benefitting: Major Macias

On April 23, 2026, Major's life was permanently changed. He was the victim of a head-on collision.

According to the Kansas City, Kansas Police Department report, witnesses described a black Ford F-150 "aggressively driving" and "excessively accelerating". Witnesses described to police they feared for their safety as the truck followed them at an "extremely close proximity."

The report states the truck:

- passed another vehicle at a high rate of speed
- crossed double yellow lines into oncoming traffic
- struck Major's Toyota Camry head-on while Major was driving properly in his lane

When first responders arrived, Major was in critical condition with severe head trauma and multiple injuries. He was unconscious and transported to KU Hospital, where he was taken to the ICU and prepared for emergency surgery. Major suffered a traumatic brain injury (TBI) that has changed every part of his life. A TBI is not "just a concussion." It affects memory, speech, personality, movement, emotional regulation, independence, and the ability to simply live the life you had before. This wasn't a minor accident. This was a catastrophic, avoidable collision that left a young man fighting for his life.

Major is still fighting to get back to us. He will require neurological, physical and occupational therapy to get back to us and be as independent as he can.

Please join us in this fundraising event to help support Major through his recovery.
